

Call it the red giant.

{ \$14,500 }

*As seen in the PBS documentary – Seeing in the Dark*

Machined to shoulder 150 lbs of imaging gear, the Paramount ME is nothing short of a giant. It'll lift your observatory to new magnitudes, with unrivalled precision and performance. To deep space, where science is made and dreams are fulfilled. The ME, featured in the Timothy Ferris PBS documentary *Seeing in the Dark*. Make the Paramount ME the backbone of your observatory.
